+91 9944786042 | prashith3@gmail.com | github.com/Prashith05 | Bengaluru, Karnataka, 560001, India.

PROFILE

Results-oriented Python Full-Stack Developer experienced in engineering scalable web applications using **Django, React.js, and PostgreSQL**. Skilled in architecting secure **RESTful APIs**, optimizing **ORM queries**, and automating CI/CD deployments via **Git and GitHub** to deliver clean, maintainable, and high-performance software.

SKILLS

Backend: Python, Django, REST API, Development
Frontend: HTML, CSS, JavaScript, React.js, Bootstrap5
Database: MySQL, SQL, PostgreSQL
Cloud & Platforms: AWS, Vercel, Render, Neon (PostgreSQL), Git, GitHub
Others: Linux, Shell Scripting

PROJECTS

Bus Ticket Booking Web Application | Python, Django, REST API, React.js, PostgreSQL, Git, GitHub

Live: https://bus-ticket-booking-ruddy-theta.vercel.app | GitHub: https://github.com/Prashith05/Bus-Ticket-Booking

- **Architected full-stack web application** using **React.js** and **Django REST Framework**, developing **modular RESTful APIs** and dynamic client-side state for **real-time seat reservation**, route scheduling, and interactive filtering.
- **Engineered relational data models in PostgreSQL (Neon)** with **indexing** and **ACID transactions**, preventing concurrent booking issues and achieving a **50ms average query response time** during simulated peak loads of **20+ concurrent users**.
- **Automated CI/CD pipelines** via **Git and GitHub**, configuring continuous, **minimized downtime** production deployments across **Render** (backend API server) and **Vercel** (frontend) on every code push.

Employee Management System | Python, Django, PostgreSQL, Django ORM, Git, GitHub, Render

Live: https://employee-management-system-k1g3.onrender.com

- **Engineered a Django employee management system** managing **50+ simulated corporate records**, executing full **CRUD lifecycle operations** across departmental, role, and appraisal datasets.
- Implemented secure **session-based authentication** and optimized **ORM queries**, eliminating **N+1 query bottlenecks** and reducing server response time by **25%** on complex table joins.
- **Architected relational schemas in PostgreSQL (Neon)** and automated **CI/CD deployment to Render** via **GitHub**, delivering **production updates with minimized downtime** on every release.
- **GitHub: https://github.com/Prashith05/Employee-Management-System**

EXPERIENCE

1.Python Full-Stack Developer Trainee | PySpiders, Bengaluru, KA | Jun 2025 – Apr 2026

- **Engineered 2 full-stack web applications** using **Python and Django (MVT**), developing **12+ modular RESTful APIs** that optimized data exchange rates by **30%** for dynamic frontends.
- **Architected relational database** schemas in SQL, **enforcing transactional integrity** and **optimizing ORM queries** for **low-latency persistence** while managing codebases via Git.

2.Front-End Development Trainee | Alpha Fly, Theni, TN | Mar 2025 – Apr 2025

- **Constructed 5+ responsive**, mobile-first **web interfaces** using **HTML5, CSS3, and ES6+ JavaScript,** reducing client-side load times by **20%** and improving cross-browser rendering accuracy.
- Engineered 10+ modular frontend components using Flexbox and Bootstrap 5, improving DOM rendering speed by 15% and ensuring 95%+ layout responsiveness across mobile and desktop devices.

EDUCATION

Bachelor of Engineering Robotics and Automation | 2021 – 2025 | CGPA: 8.09

Dhanalakshmi Srinivasan Engineering College, Anna University

CERTIFICATIONS: Python Full Stack Development – Pyspiders | **Front-end Development** – Alpha fly
